There will be a daily YMQAD Audit Team/Observer meeting at 4:00 p.m. to review audit progress. Beginning on Tuesday, February 27, 1996, there will also be a daily Audit Team Leader/Observer/Los Alamos management meeting at 8:15 a.m. to communicate audit progress, to discuss potential deficiencies, and to establish needed liaison. Both daily meetings will be held at locations provided by Los Alamos.

3.0 REQUIREMENTS TO BE AUDITED AND APPLICABLE REFERENCES

The requirements to be audited will be contained in a performance-based checklist. This checklist will be developed from Los Alamos's approved and issued QA program procedures, study plans, technical procedures, and the performance objectives established and agreed upon with Los Alamos.

The conduct of the audit will be guided by the documents (latest revision) listed below:

Quality Assurance Procedure (QAP) 18.2, "Audit Program"

- Administrative Procedure (AP) 16.1Q, "Performance/Deficiency Reporting"
- AP 16.2Q, "Corrective Action and Stop Work"

4.0 ACTIVITIES TO BE AUDITED

The audit team will evaluate implementation of QA program requirements with regards to the generation of "An Unsaturated Zone Flow and Transport Model of Yucca Mountain" (Milestone 3468). Specifically, the utilization of mineralogical and petrographic data will be evaluated for the attributes listed below in support of Work Breakdown Structure (WBS) 1.2.3.4.1.5.1, "Retardation Sensitivity Analysis."

- 1. Data Identification and Usage.
- 2. Control of interfaces between the various organizations which provided input to development of the model.
- 3. Control of documentation and records that provide objective evidence of compliance with QA program requirements.

This audit will not address the activities, such as software/model validation and geochemistry, which were evaluated by Audits YM-ARC-95-11 and YMP-94-08 respectively.

A performance-based audit evaluates products and activities to determine the degree to which they meet program requirements and management commitments and expectations. This evaluation of process effectiveness and product acceptability will be based upon:

- Satisfactory completion of the critical process steps
- Acceptable results and quality of the end product
- Documentation that substantiates quality of products
- Performance of trained and qualified personnel
- Implementation of applicable QA program elements
