Docket No. 50-443
Response to Order for Compensatory Measures Related To
Training Enhancements on Tactical Firearms Proficiency and Physical
Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel (EA-03-039)

By this letter Florida Power & Light (FPL) and FPL Energy Seabrook, LLC (FPL Energy Seabrook) hereby answers the April 29, 2003, Order for Compensatory Measures Related to Training Enhancements on Tactical Firearms Proficiency and Physical Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel (EA-03-039) ("Order"). FPL and FPL Energy Seabrook fully intend to comply with the Order and will complete implementation of the compensatory measures described by October 29, 2004.

However, because the NRC has used force-on-force testing as a standard by which compliance with the DBT was evaluated, FPL and FPL Energy Seabrook requests that the NRC provide a clear definition of the objectives and criteria for force on force exercises so appropriate revisions can be made to safeguards contingency plans, security plans, and security officer training and qualification plans. This definition should include 1) the purpose of the force-on-force exercise; 2) the success criteria for the force-on-force exercise; and 3) the definition of adversary rules of engagement and adversary tactics. Without these clarifications, the standards by which performance will be measured will be a moving target and not in keeping with the Commission's Principles of Good Regulation.

To enable FPL and FPL Energy Seabrook to meet the compliance date specified in the Order, these clarifications are needed as soon as possible. If clarification cannot be provided by October 1, 2003, the dates for implementation can begin to be impacted. In the event clarification is not provided by October 1, 2003, FPL and FPL Energy Seabrook respectfully request that the Director, Nuclear Reactor Regulation extend the dates for submitting the revisions to the security plans and training and qualification plans and for full implementation of the Order on a day-for-day basis until such clarifications are provided.

FPL and FPL Energy Seabrook also confirm their understanding that the Commission intends to exercise enforcement discretion to accommodate issues that may arise as licensees, in good faith, take reasonable actions to implement the specific requirements of this Order. We further

IES3

understand that the Commission will exercise enforcement discretion for the period necessary to resolve such issues and to integrate the requirements of this Order with the orders issued February 25, 2002, as well as with other pertinent regulatory requirements, and our safeguards contingency plans, security plans, and security officer training and qualification plans.

Sincerely yours,
