

DOCKET NUMBER
PROPOSED RULE **PP 20**
(68 FR 09595)

101

I would like to demand that the NRC do the following in regards to the policy towards radioactive waste.

- 1) Focus the rulemaking on better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately.
- 2) PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses.
- 3) Prevent additional radiation exposures rather than "justifying" them with computer codes and dose modeling created by nuclear advocates. Since there is no safe dose of ionizing radiation, we accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit.
- 4) Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.
