EVALUATION OF RESPONSE TO DEFICIENCY REPORT (DR) YM-97-D-020 RESULTING FROM OFFICE OF QUALITY ASSURANCE (OQA) SUPPLIER AUDIT OQA-SA-97-006 OF MET ONE INSTRUMENTS

The OQA staff has evaluated the response to DR YM-97-D-020. The response has been determined to be satisfactory. Verification of completion of the corrective action will be performed after the effective date provided. Any extension to this date must be requested in writing, with appropriate justification, prior to the date. Please send a copy of extension requests to Deborah Sult, OQA/QATSS, P.O. Box 30307, Mail Stop 455, North Las Vegas, Nevada 89036-0307.

If you have any questions, please contact either James Blaylock at (702) 794-1420 or Daniel A. Klimas at (702) 794-1495.

WASHINGTON, D.C.
PERFORMANCE/DEFICIENCY REPORT RESPONSE
14 Remedial Actions:
The Met One Instrument (MOI) Quality Control (QC) program and implementing Quality Operating Procedures (QOPs) will be reviewed and revised to comply with the direction and recommendations prescribed in the audit deficiency report. These activities are scheduled to be completed by March 3, 1997.
15 Extent of Condition: (Not required for PR)
There are several concerns listed in the deficiency report, which are directed at A program improvement. The extent of these conditions have been determined to be limited as programmatic in nature; having little or no adverse impact on the services provided by MOI.
16 Root Cause Determination: (Not required for PR) Required ☑ Yes ☐ No
17 Action to Preclude Recurrence: (Not required for PR) Required  Yes  No
See continuation pages 4 of 5 and 5 of 5. Response is directed at resolution of concerns identified in Block 6, Description of Condition and Block 10, Recommended Actions.

#### PR/DR CONTINUATION PAGE

5. Requirements: (continued from Page 1)

QARD, Section 4.0, Paragraph 4.2.1C.1:

A requirement for the supplier to have a documented Quality Assurance (QA) program that implements applicable QARD requirements prior to the initiation of work. The extent of the QA program shall depend on the scope, nature, or complexity of the item or service being procured.

6. Description of Condition: (continued from Page 1)

Contrary to the above requirements, the following conditions were identified during supplier Audit OQA SA-97-006 of MOI:

- 1) There are no implementing procedures that adequately describe the requirements for Implementing Documents.

  Document Control, Control of Purchased Items and Services, Corrective Action, QA Records, and Audits.
- There is no objective evidence (i.e., documentation) that personnel performing quality related activities have been indoctrinated and trained to the technical and quality assurance elements that they implement.
- 3) The purchase orders for suppliers of calibration services (i.e., SIMCO; Caltronics), do not contain quality and technical requirements.
- 4) There is no documented evidence of evaluations for all MOI suppliers.
- 5) There is no procedure requirements for the review, approval, and control of implementing documents.
- 6) There are no methods to describe the identification, distribution, and control of procedures.
- 7) There is no evidence that the MOI QC Manual is reviewed annually, as required by their manual.
- 8) The temperature and humidity recorder, Serial Number 6529, is past due for calibration.
- 9) Measuring and Test Equipment utilized is not entered into the calibration system using the calibration sheets, as required by MOI procedure.
- 10) There are no controls for identifying or segregating out-of-calibration equipment.
- 11) There is no evidence of internal audits being performed, as required.

#### PR/DR CONTINUATION PAGE

Block 17 (continuation)

1. There are no implementing procedures that adequately describe the requirements for Implementing Documents, Document Control, Control of Purchased Items and Services, Corrective Action, QA Records, and Audits.

Response: Procedures (QOPs) and related processes, which govern these criteria will be revised to reflect the controls established and implemented by MOI. This activity is scheduled to be completed by March 3, 1997.

2. There is no objective evidence (i.e., documentation) that personnel performing quality related activities have been indoctrinated and trained to the technical and quality assurance elements that they implement.

Response: Subsequent to the audit, training documentation has been submitted for auditor review and acceptance.

3. The purchase orders for suppliers of calibration services (i.e., SIMCO; Caltroinics), do not contain quality and technical requirements.

Response: QOP-1-1 will be revised to reflect this requirement. This activity is expected to be completed by March 3, 1997.

4. There is no documented evidence of evaluations for all MOI suppliers.

Response: Parts suppliers are not audited, however, calibration service suppliers are audited. Audit documentation of SIMCO has been completed. See attached..

5. There is no procedure requirements for the review, approval, and control of implementing documents.

Response: A QOP will be developed to prescribe the processes and controls for development, review, approval and control of QOPs. This activity is scheduled to be completed by March 3, 1997.

6. There are no methods to describe the identification, distribution, and control of procedures.

Response: Methods, which describe the identification, distribution, and control of QOPs, will be described in a QOP. This activity is scheduled to be completed by March 3, 1997.

7. There is no evidence that the MOI QC Manual is reviewed annually, as required by their manual.

Response: Requirements for annual review are to be modified to reflect an "as required or deemed necessary" frequency for review of the QC Manual.

8. The temperature and humidity recorder, Serial Number 6529, is past due for calibration.

Response: The temperature and humidity recorder, Serial Number 6529, has been recalibrated.

#### PR/DR CONTINUATION PAGE

Block 17 (Continued from Page 4 of 5), Response to Block 6, Description of Conditions

9. Measuring and test Equipment utilized is not entered into the calibration system using the calibration sheets, as required by MOI procedure.

Response: QOP-2-2, will be revised to reflect current procedural practices. This revision will be accomplished by March 3, 1997.

10. There are no controls for identifying or segregating out-of-calibration equipment.

Response: QOP-2-2, will be revised to include segregation of equipment identified as being out-of-calibration.

11. There is no evidence of internal audits being performed, as required.

Response: Documentation and frequency of audits will be described in the MOI program. This activity is scheduled to be completed by March 3, 1997.

Response to Block 10, Recommended Action.

The noted deficiencies, as described in Block 6, will be corrected as described in the responses to the eleven concerns identified. Impacts to the calibration services provided have been evaluated and determined to have very little or no adverse impacts. The deficiencies identified are of a programmatic nature and do not impact the technical calibration services provided.

### CERTIFICATION

This certifies that <u>JACUE BARNES</u> has been properly trained on the assembly of <u>2484 Cup Assy.</u> using the proper procedure and fully understands the performance and quality requirements involved.

MSG:

Dear David

Here is the audit report on SIMCO that was done on November 18th, 1996. The calibration vendor has gone through a number of changes of ownership in the past year or so. They started as Caltronics, were bought out by AEL and recently purchased again by another company called SIMCO.

Received your FAX message, OK.

If you have any other questions regarding this, please contact me.

Regards

**DENNIS RECLA** 

Quality Manager

### Met One Instruments

November 19, 1996

TO:

Joe Gren, Tom Pottberg, David Frith, Rod Ralston

FROM:

Dennis Recla Manager Quality Control

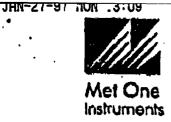

SUBJECT: Audit of SIMCO, Instrument Calibration and Repair

On November 18th, David Frith and I went to the SIMCO Instrument Calibration and Repair Facility in Richardson, Texas. At the location we mot with Eric Webb the operations supervisor. We have been using a company named AEL, but they were purchased by SIMCO. The structure of AEL, remains in place, and calibration documentation of AEL is being converted to SIMCO. There are no major changes that would effect the calibration and certification of the equipment that we send to them. AEL proceedures remain in place, and are being revised with SIMCO title blocks as required. The new QC Manual was given to us, and it is currently out to ISO for approval.

The combining of the two companies, has provided a much larger space to work in, and has added the addition of nearly all calibration data entry directly to the computer system. Test forms were examined, and several of the Standard Operating Proceedures were examined from the QC Manual.

Overall, it was a well kept facility, and documentation was controlled by the software provided by SIMCO. It also kept track of standards calibration, so that they could be recalled for certifications. I talked with them about certification of RTD probes and other temperature measurment devices, but they are still unable to provide the necessary calibration. We will remain with Rosemount on these items.
