SURVEILLANCE RESULTS

9. BASIS OF EVALUATION/DESCRIPTION OF OBSERVATIONS: <p>On March 7, 1997, a surveillance was performed of the CRWMS M&O TPM Organization at their office in the Summerlin Facility, Building 11, Las Vegas, Nevada. The objective of the surveillance was to review the CRWMS M&O process for maintaining the On-line Procedure Database and to assure that procedures are current and that changes made to procedures are properly incorporated and posted electronically.</p> <p>Maintenance of the OCRWM Program Procedures Database (OPPD) was performed in accordance with the procedure requirements listed below:</p> <p>YLP-5.2Q-AMA, REV. 0, Interim Change Notice (ICN) 1, "Maintenance of the OPPD", contains the following requirements:</p> <p>See Page(s) <u>2-3</u></p>	
10. SURVEILLANCE CONCLUSIONS: <p>Out of a total of 113 controlled documents contained in the OCRWM database, approximately 15 documents were sampled to determine that the latest version was contained in the OPPD. A comparison was also made to determine that the controlled distribution copy (hard copy) and the electronic version of controlled OCRWM program procedures were the same. All of the procedures reviewed were compared and found current. All changes to documents posted in the electronic database are redlined, thus allowing the reader to easily identify the changes. Based on review of objective evidence and interviews with TPM personnel, it was determined that the adequacy and effectiveness of implementation of the quality assurance program requirements associated with the maintenance of the OPPD is satisfactory. No deficient conditions were identified during the surveillance.</p> <p>Deficient Conditions: None Recommendations: None</p>

Block 9 (continued) BASIS FOR EVALUATION/DESCRIPTION OF OBSERVATIONS:

Para 5.1.1, Upon approval of an OCRWM Program Procedure for which the OPPD has processing responsibility the Word Processing Center Personnel (WPCP):

- attaches the new .WP5 version of the document from the Plans and Procedures Division WordPerfect file to the OCRWM Document form and saves the file to the OPPD to create the electronically controlled document.
- Opens the OPPD, launches the document, and visually examines the document page by page, to ensure that the electronically controlled document in the OPPD matches the "final approved document"
- Completes each block of Section 1 of the OPPD checklist, and signs where appropriate to indicate accurate completion of each checklist step.

Documents (see objective evidence) associated with the creation of electronically controlled OCRWM Program Procedures were reviewed and found to be in compliance with the above procedural requirements.

Para 5.1.2 Upon revision of an OCRWM Program Procedure for which the OPPD has processing responsibility the WPCP:

- deletes the existing electronically controlled document from the OPPD for a document that is being revised by a revision or an ICN, as of the effective date of the revision.
- ensures that each OCRWM Program Document, for which the OPPD has processing responsibility is maintained in its current version by updating the OPPD.
- completes each block in Section 2 of the OPPD Checklist, and signs where appropriate to indicate accurate completion of each checklist step.

Documents (see objective evidence) associated with revisions, interim changes, and deletions to OCRWM Program Procedures were reviewed and found to be in compliance with the above procedural requirements.
