DOCKETED
USNRC

June 6, 2003 (4:03PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

DOCKET NUMBER
PROPOSED RULE PR 20
(68FR09595)

I recently became aware of the proposal to further deregulate nuclear waste. i was surprised to find out the it has already been deregulated to some extent and that some forms/levels of nuclear wastes have been approved for inclusion in products used by the public. This alarms me becuae it means I have been exposed to nuclear waste with out my knowledge. * Focus the rulemaking on better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately;

* PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses;

* Prevent additional radiation exposures rather than "justifying" them with computer codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards.

* Since there is no safe dose of ionizing radiation, we accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit.

* Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities. *Give notice that a product for public use contains nuclear waste, no matter how "negligible" the levels may be in your eyes.
