Subject: PUBLIC COMMENT ON THE USES and DISPOSITION of NUCLEAR WASTE

DOCKET NUMBER
~~PROPOSED RULE~~ 20
(68 FR 09595)

125

hello:

seeing as how we are not advanced enough to reliably launch the toxic sludge into space without the chance of it blowing up on launch i guess we are going to have to find a way to create clean energy that will not create any more bubbling goo. as to what to do with the goo we've made thus far, i would suggest:

1. sell it to campbell's they can put it in thier pea soup
2. make toys for kids i remember playing with green slime as a kid wouldnt it be great if it was 100% real toxic sludge?
3. have a lottery where the "winner" recieves a 55 gallon drum of the sludge to do with as they please.
4. make tooth pase with it called tooth-b-gone we dont need those pesky pearly whites anyway.
5. ignore it and maybe it will go away...
