June 6, 2003 (10:50AM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

If you people think that nuclear waste is safe enough to put into playgrounds, soils, pipes, garbage dumps, etc., then why don't you just take it on home with you and put it under your own beds? I do not want to be poisoned, I do not want my animals, the land, or children or grandchildren to be sickened by this stuff. I think that is an obvious, sane position to hold. I am not crazy. I suggest you think about what an insane position you are in, suggesting the feasibility of contaminating the environment with this stuff because you do not want the trouble of disposing of it properly.

Susan M. Finsen, Ph.D.
