Subject: What to do with nuclear waste?

June 6, 2003 (3:06PM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Hi,

I suggest we build you home and all the executives' homes with only "safe" nuclear material....concrete walls, floors and roof. If you do not like that idea have your immediate neighbor's house be made with these "safe" materials.

How about having your family only eat and drink "safe" nuclear products for 5 years? If you or your children have no health effects then it could be deemed "safe".

Let's get real!

Chris Helmstetter
