**Subject:** nuclear waste exposure Not Acceptable

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Dear NRC members,

Nuclear fuel and waste are some of the most hazardous materials on this planet. No amount of use or reuse of these materials is acceptable. They must be isolated, and further creation of these toxic, expensive materials must cease.

147

Further, the citizens know that there are many sources of fuel that are not hazardous. There is no way anyone can sell us on accepting more nuclear exposure. It is ludicrous, and amoral.

I appreciate your time and help in this matter.

Sincerely Yours,

Rachel Morris  
Oak View, CA
