OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

To Whom It May Concern

I would like to indicate that I would not be in favor of not only your increasing the amount of radioactivity in materials used for consumer use, but also I am not in favor of it being used to any purpose other than your using our tax dollars to find a safe way to decontaminate this material.

Also, who was responsible for not having thought of ways to remove this material safely in the first place. People are given incorrect information about the potential dangers of this material and here we are still dealing with nuclear waste.

Please do not continue to harm the population with a poison that has no remedy or can be healed.

One final question: Would you be willing to allow your family's children to play with radioactive toys, or would you like to drink from a radioactive cup.

Thank you.
