Subject: Deregulation/recycling

DOCKET NUMBER
PROPOSED RULES PR 20
(68FR09595)

You have all gone mad, you regulators and your bosses. The harm you are doing to all life on this planet will surely affect you and the children I hope you love. Stop this release and cycling of radioactive materials for consumer and industrial - and military - materials use from the nuclear industry (which you so irresponsibly allow to pollute us with their permitted and accidental releases). I speak to you as individuals, not just as an agency created ostensibly to ensure the safety of an unsafe industry and to protect the public from harm.

You who work under orders from above, stop, think, read the works of INDEPENDENT scientists and researchers, and, yes, refuse to obey orders that are wrong and harmful (even to those who give them). Speak up. Some of you know what you are doing when you "obey orders".

A new report has just been released from the UK, the 2003 European Committee on Radiation Risk; Health Effects of Ionising Radiation Exposure at Low Doses for Radiation Protection Purposes, Regulators' Edition, Brussels, 2003. Green Audit, Aberystwyth, UK. It reveals that the safety standards you go by are wrong by hundreds to thousands of times.

Recall all the radioactive materials you have allowed to be released and sequester them as safely as present science can do. Stop their release and that of depleted uranium and non-depleted uranium to the companies which manufacture and sell them to others, whether it be for commercial, industrial or military use. Protect your families and theirs and ours.

Mitzi Bowman, Coordinator, Don't Waste Connecticut, (203)389-2067
97 Longhill Terrace, New Haven, CT 06515
