Subject: nuclear waste

June 9, 2003 (8:57AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Attention Rulemaker and adjudicative staff,

I writing to express my strong opposition to release of radio active material/nuclear waste for a broad spectrum of usages common to the general public. Sounds like an attack on the American people. Haven't we noticed that these substances cause cancer? Haven't we noticed that the People of Iraq have an enormous increase in cancer due to their exposure level to depleted uranium at loose at large in populated areas. Haven't we noticed that Americans' immune systems are highly compromised (epidemic cancer, Aids, Epstein Bar, fibromyalsia) in direct corelation to the proliferation of toxic chemicals and compounds into the environment. Who profits from the use of nuclear Waste products in general public materials? Why do we value their profit over the lives of the American people?

Sincerely,
Katie Mickey
