DOCKET NUMBER  
PROPOSED RULE PR 20  
(68FR09595)

DOCKETED  
USNRC

June 9, 2003 (8:57AM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

128

I propose another option to the NRC suggested rule changes. It is that the NRC do the following:

- \* Focus the rulemaking on better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately;
- \* PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and

weapons into the marketplace for unrestricted or conditional uses;

- \* Prevent additional radiation exposures rather than "justifying" them with computer

codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards.

- \* Since there is no safe dose of ionizing radiation, I accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit.

- \* Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.
