Subject: Recycling of "slightly radioactive" products

June 10, 2003 (7:56AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary:

I strongly oppose any recycling of products that may be even "slightly" radioactive. Intensive efforts must be made to keep all contaminated products from entering into the consumer market. As a mother of small children, I am outraged that this would even be considered. What increased dose levels will developing babies be exposed to? Of course, we would never know. We do not need to increase exposure to a cause of childhood cancer and death.

Sincerely,

Joyce McGrath
