**Subject:** regulating nuclear waste

DOCKETED  
USNRC

June 11, 2003 (12:47PM)

As one who worked for the Atomic Energy Commission at Brookhaven National Laboratory in the 1950's, I have always since had serious doubts about whether the benefits of nuclear energy could outweigh the dangers. I may die at a reasonable age before the answer is known, but meanwhile it is ESSENTIAL that all disposal of nuclear waste, no matter how small, be carefully regulated and recorded.

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Such regulation and careful records MAY be essential for the continuation of the human race until the year 2200 AD. Obviously, nobody reading this will live long enough to know, but we should not take chances with committing genocide.

Please keep careful regulation and records of nuclear waste.

Patricia Clark Kenschaft, Ph.D.
