DOCKET NUMBER
PROPOSED RULE **PR 20**
(68FR09595)

(6/4/03)

Hi, I hope your Spring is as beautiful as here!

It's ironic that the Earth can yet be so beautiful on a planet so beset by so many nightmarish problems.

Yester-evening I shared watching a video, with some friends. We are all deeply horrified and outraged by the story told within. Anyone of any conscience would be.

It's the story of so-called "depleted uranium", or d.u.. That is the misnomer of all time! There is nothing "depleted" about "depleted uranium".

This story is told by a 30-year army officer, retired, who was assigned to d.u. clean-up and containment during and after the gulf war. He ~~will~~ is well qualified, as he also happens to be a highly educated physicist. He is very knowledgeable of nuclear physics and able to communicate the issue in clear terms.

Please acquire a copy of this video and view it. If you care about our ~~country~~ society and the well being of it's people you must inform yourself on the story of "depleted uranium" and it's consequences to human society, including our's. There is no better source of such information than this 30 minute video. Please examine it.

Dr. Doug Rokke/D*u 238/ at, voicesofconscienceyahoo.com.

If you cannot acquire a copy please contact me and I will see to it you do.

In behalf of Life on Earth,

Tommy Walen

PETITION

TO STOP USE OF RADIOACTIVE WASTE IN CONSUMER PRODUCTS

We, the undersigned, call on the United States President, Vice President, Congress and all federal, state and international regulators and legislative bodies to recapture, stop, and prevent release/clearance/recycling/dispersal of radioactive wastes and materials into consumer products and the environment.

We support regulation and isolation of radioactive wastes from nuclear power and weapons. We oppose the use of radioactive materials and wastes in consumer products and building materials including but not limited to metals, concrete, plastics, glass, paper, wood, soil, and equipment.

We call on the US Nuclear Regulatory Commission to reverse its efforts and expenditures to release radioactive wastes and to initiate a policy requiring regulatory control and isolation of all radioactive wastes. We demand the recapture and recall of radioactive materials and wastes that have been released into the marketplace.

We call on the US Department of Energy to halt all releases of all radioactive wastes and materials into the marketplace, to recapture that which has been released and to immediately revoke their internal orders allowing radioactive release.
