Attn: Jerry J. Lorenz, REECO, Project Support and Document Preparation Office, Technical Information Section

SUBJECT: PUBLICATIONS--Transmittal of report entitled, "Geophysical Investigations of concealed faults near Yucca Mountain, Southwest Nevada", by D.A. Ponce (12/22/92 Version)
Interagency Agreement No. DE-AI08-92NV10874

"PRELIMINARY DRAFT"

Dear Carl:

Two copies of the subject report are enclosed for review in your office and concurrence for release as proceedings of the 1993 International High Level Radioactive Waste Management Conference to be held April 28-30, 1993, in Las Vegas, Nevada.

This report received USGS technical review by Vicky Langenheim and Howard Oliver, who were chosen because of their general knowledge of the work and techniques. A QA review was performed by A.H. Handy, YMPB-QA Office and a preliminary Policy review was performed by G.L. Ducret, YMPB.

Technical data for this report has been submitted in accordance with AP 5.10. The tracking number for the TDIF associated with this data is GS921208314212.015.

This report was prepared under WBS number 1.2.3.2.2.1.1. There are no milestones associated with this report. The deadline for delivery of this paper to ANS is January 22, 1993, but a brief extension has been granted. Upon publication, this report will be submitted to OSTI in accordance with DOE order 1430.2, under distribution category UC-814.

Sincerely,

Richard H. Lundy
David H. Appel, Chief
Hydrologic Investigations Program
Larry R. Hayes, Chief YMPB
