RULEMAKINGS AND
ADJUDICATIONS STAFF

NRC--

I was shocked to read that you are even considering allowing more radiation into the environment where it can harm the health of American citizens. Instead I believe you should protect the American citizens, taxpayers and voters by:

PROHIBITING RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses;

Preventing additional radiation exposures rather than "justifying" them with computer codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards.

Stopping the poisoning of us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.

There is no safe dose of ionizing radiation, we accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit.

Sincerely
Debora Jordan
