Dear Mr. Secretary:

DOCKETED USNRC

(214)

June 17, 2003 (2:49PM)

OFFICE OF SECRETARY RULEMAKINGS AND ADJUDICATIONS STAFF

What disposition of nuclear waste should the public accept? NONE.

We want NO radioactive building materials, kitchen appliances/utensils, tools, sports equipment, bicycles, toys, bridge abutments, asphalt or anything else.

It would be unethical and just plain wrong to dump radioactive materials on the public. These materials should be separated, isolated from the public. Do not justify releases with dose-based or risk-based standards dreamed up by the nuclear industry.

Stop poisoning the public.

Thank you for this opportunity to express my opinion and the opinion of my group, Action for a Clean Environment.
