Subject: To Glow or Not to Glow

June 19, 2003 (7:40AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Secretary of NRC secy@nrc.gov

Thank you Thank you: the NRC IS NOW SEEKING PUBLIC COMMENT ON THE USES AND DISPOSITION OF NUCLEAR WASTE THAT THE PUBLIC WILL ACCEPT AND THE DOSE LEVELS THAT PUBLIC WILL ACCEPT FROM DEREGULATED NUCLEAR WASTES

You have got to be kidding- no I don't want radioactive zippers or anything of the sort. You guys are totally insane.

But as the human world as we know it is pretty crazy, and you might get away with this, be sure to label all of my zippers and dinnerware with which radioactive substance you have put in it.

As an example my sweater might say 20% rayon, so as a consumer I know what I am buying. So please alert me as to when you are inserting these carcinogens. You see, just as I may be allergic to rayon, or peanuts, I may be allergic to plutonium.

for example

Baby stroller- 20% depleted uranium

Fiesta ware dinner plates- 4% plutonium

Graham crackers- .5% uranium

I want you to label this stuff, so that when I start glowing , or go for my chemo treatment I will have a sense of awareness and control. For God sakes, give me labelling or give me death.

Michele Riddell
