

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

RIN 3150 - AH-20

List of Approved Spent Fuel Storage Casks: NAC-MPC Revision

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations revising the NAC International, Inc., Multipurpose Canister cask system listing within the “List of Approved Spent Fuel Storage Casks” to include Amendment No. 3 to the Certificate of Compliance (CoC). This amendment would incorporate changes in support of the Yankee Nuclear Power Station (Yankee Rowe) fuel loading campaign and make corrections to the Connecticut Yankee technical specifications. Specifically, the amendment would incorporate fuel enrichment tolerances; incorporate fuel assemblies with up to 20 damaged fuel rods, recaged assemblies, the Yankee Rowe damaged fuel can, and assembly weights up to 432 kilograms (950 pounds); revise the average surface dose rate limits for the concrete cask; incorporate administrative changes in the American Society of Mechanical Engineers (ASME) Code Alternatives; correct the Connecticut Yankee tables for fuel assembly limits and intact fuel assembly characteristics; and incorporate editorial and administrative changes in the CoC.

#### SUPPLEMENTARY INFORMATION:

For additional information, see the direct final rule published in the final rules section of this Federal Register.

#### Procedural Background

This rule is limited to the changes contained in Amendment 3 to CoC No. 1025 and does not include other aspects of the NAC-MPC cask system design. The NRC is using the "direct final rule procedure" to issue this amendment because it represents a limited and routine change to an existing CoC that is expected to be noncontroversial. Adequate protection of

public health and safety continues to be ensured. The direct final rule will become effective on **(insert date 75 days after publication in the Federal Register)**. However, if the NRC receives significant adverse comments by **(insert 30 days after publication in the Federal Register)**, then the NRC will publish a document that withdraws the direct final rule and will subsequently address the comments received in a final rule. The NRC will not initiate a second comment period on this action.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, in a substantive response:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the CoC or technical specifications.
