MEMORANDUM

**TO: Gary Estep, Manager, Buchanan County Transfer Station
Joe Baldwin
Lee Keene**

FROM: Roger D. Sword, Director (RDS)

DATE: June 19, 2003

I received a call today from the Nuclear Regulatory Commission. It appears that Consolidated Coal Corporation has lost a gauge that they use at one of their mines in Buchanan County and the device possibly was brought to the Buchanan County Transfer Station sometime between January 29 - June 18, 2003. The device uses low level radiation to perform its functions.

It is extremely important that this device be found or tracked to its possible whereabouts. If you remember seeing or intercepting the device, please step forward immediately. No further questions or follow-up will be pursued if the device can be found.

It probably weighs about 50-60 lbs, rusty in color, with a silver plate on top, with a padlock over the shutter (see attached diagram).

Please contact me immediately if you have any information to provide.

**cc: Earl Rife
Bryan A. Parker, Nuclear Regulatory Commission**
