Call - A. Snyder (AMS3)

A. J. Murphy (ASM1)

United States Nuclear Regulatory Commission

Template = ADM-013

Date: 5.31.03

Dear Ms. Snyder:

Public health and safety concerns associated with transporting high-level nuclear waste can best be addressed by minimizing shipments. Please take into account the checked items below as my comments on the Package Performance Study (PPS) draft test protocol:

NRC should upgrade cask licensing regulations to require full-scale physical testing of each cask design.

At the very least, the PPS should include testing of the General Electric IF-300 cask used by Progress Energy, the only utility currently shipping nuclear waste.

The PPS should include explosive testing to study cask response to a terrorist attack.

TEST THE CASK DESIGN BEING USED IN NORTH CAROLINA
