radioactive waste

I can't believe it's come to this.

The NRC needs to be told not to allow nuclear waste to be used in frying

pans?

in dental braces?

in IUDs?

The NRC is pushing for nuclear waste to be dispersed unregulated into

everyday commerce? Where has your common sense gone?

Do you have family or children that you care about?

How can you possibly think dispersing nuclear waste into everyday commerce is

safe?

I am at a total loss for words.

You should be PROHIBITING RELEASE not allowing it for everyday use!!!!!!!!!
