Subject: Use of nuclear waste in commercial applications

DOCKET NUMBER
PROPOSED RULE PR 20
68FR09595

Please honor the basic reason for government as protectorate of human beings. Please dispose of nuclear waste responsibly. How in good conscience can any policy maker advocate reckless use of nuclear waste and sleep at night, love their children/grandchildren, respect the right of good health for all? I urge you to maintain conservative disposal of nuclear waste no matter what the financial cost. Respectfully, Steve Wood, 265 Thoreau Street #3, Concord, MA 01742
