**SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION NRC SAFEGUARDS
INSPECTION OF COMPLIANCE WITH ORDER - INSPECTION REPORT
50-445/03-05; 446/03-05**

Dear Mr. Terry:

From May 19 to June 5, 2003, the NRC completed an inspection of your Comanche Peak Steam Electric Station. The enclosed report documents the inspection findings which were discussed on May 23, 2003, during a pre-brief and on June 5, 2003, at a telephonic exit meeting with you and other members of your staff.

This inspection examined activities conducted under your license as they relate to safety and compliance with an Order issued on February 25, 2002, which required your site to implement specific measures related to the security of your facility. The inspection utilized Temporary Instruction 2515/148, "Inspection of Nuclear Reactor Safeguards Interim Compensatory Measures," to verify implementation of the Order as clarified in your responses dated March 18, May 16, June 20, and August 30, 2002. Within these areas, the inspection consisted of selected examination of procedures and representative records, observations of activities, and interviews with personnel.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of the non Safeguards Information portions of this letter, its enclosure, and your response will be made available electronically for public inspection in the NRC Public Document Room or from the

Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

//RA//

SUMMARY OF FINDINGS

IR 05000445-03-05; IR 05000446-03-05; TXU Energy; on 5/19-6/5/2003; Comanche Peak Steam Electric Station, Units 1 & 2; TI 2515/148, Verification of Compliance With Interim Compensatory Measures Order.

The inspection was conducted by one senior physical security inspector, one senior resident inspector, and one resident inspector.

Cornerstone: Physical Security

- On February 25, 2002, the NRC imposed by Order, Interim Compensatory Measures to enhance physical security. The inspectors determined that, overall, the licensee appropriately incorporated the Interim Compensatory Measures into the site protective strategy and access authorization program; developed and implemented relevant procedures; ensured that the emergency plan could be implemented; and established and effectively coordinated interface agreements with offsite organizations.
- The inspectors identified an unresolved item related to the failure to evaluate the impact of a waterborne threat as specified in Item B.1.c of the Order. This item remains open pending review by the Office of Nuclear Security and Incident Response (Section II.C.2).
- The inspectors identified an unresolved item regarding loss of microwave intrusion detection system zones as required by Item B.2.a.(1) of the Order. This item remains open pending review by the Office of Nuclear Security and Incident Response (Section III.A.2).
- The inspectors identified an unresolved item related to the failure to harden a vital area structure as required by Item B.4.g of the Order. This item remains open pending review by the Office of Nuclear Security and Incident Response (Section V.G.2).
- The inspectors identified an unresolved item relating to the failure to evaluate the consequences of hazardous material transportation as specified in Item B.5.c of the Order. This item remains open pending review by the Office of Nuclear Security and Incident Response (Section VI.C.2).
