Dear Ms. Brangan:

In response to your request at the February 1993 workshop on the Enhanced Participatory Rulemaking in San Francisco, I am sending you the enclosed copies of two Nuclear Regulatory Commission documents on radioactive effluents from nuclear power reactors. The first document, NUREG/CR-2907, v. 10, lists solid, liquid, and airborne effluents from licensed nuclear power reactors in the United States during 1989. The second document, NUREG/CR-2850, v. 10, provides estimated individual and population doses resulting from liquid and airborne effluents. Both reports are updated annually.

Please call me at (301) 504-1298 or write me at mailstop 5E4, U.S. NRC, Washington, DC 20555, if you have any additional questions or comments.

Sincerely,
