FOR HLWT  
LLW.

Dear John Greeves;

I wish to ask you a very serious Question: If a Plasma Gun was built which could incinerate and vaporize Nuclear Radioactive Waste, by condensing it's mass down to 99 percent of it's original volume content, who in the government would have the official clearance to Nuclear Radioactive Waste, so it may be possible to actually test run this Plasma Gun on real Nuclear Radioactive Waste to prove that this particular Plasma Gun does actually indeed performs in vaporizing Nuclear Radioactive Waste, by condensing it's mass down to 99 percent of it's original volume content.

John, you may not believe this but a Plasma Gun has just been developed which can actually vaporize Nuclear Radioactive Waste down to 99 percent of it's original volume content, and the developers of this amazing Plasma Gun breakthrough are now looking for access clearance to a Nuclear Radioactive Waste Storage Facility to demonstrate that this Plasma Gun does indeed performs in vaporizing Nuclear Radioactive Waste, by condensing it's mass down to 99 percent of it's original volume content.

I thank you in advance for taking the time out of your very busy schedule to send me the name and mailing address of a government official who could give the official go ahead clearance access to a Nuclear Radioactive Waste Storage Facility, so it will be possible to demonstrate that this Plasma Gun does indeed performs in vaporizing Nuclear Radioactive Waste, by condensing it's mass down to 99 percent of it's original volume content. I eagerly look forward to your reply.

Sincerely,  
*Daniel John Mahoney*
