Information Tour on Waste Management in the United States in June 1992

Dear Mr. Bernero,

PreussenElektra is one of the biggest German electricity producing utilities and we are running 5 nuclear power plants.

In our department "Operation of Nuclear Plants" we have a special group which is in charge of all wastes coming from our nuclear power plants and from reprocessing of our burned fuel.

This group is also in charge of general questions of waste management and final deposit of radioactive wastes.

In June 1992 the department leader Mr. Sönke Albrecht and the group leader Dr. Carl Reiner Jungmann are planning to visit the USA and to have a look at outstanding waste management facilities. With this letter we would like to ask you if you can help us.

Our special interest are:

- burned fuel storage
- conditioning of burned fuel for direct disposal
- direct disposal
- waste conditioning
- intermediate storage of waste and
- final disposal of waste.

It would be very nice if you could help us and we could fix some dates in your installations.

Please do not hesitate to contact us under the phone number:
05 11/439 28 27.

Many thanks in advance.

Best regards

PreussenElektra Aktiengesellschaft
