Subject: Nuclear Waste

DOCKET NUMBER
PROPOSED RULE PR 20
68FR09595

1536

Please do not relax your standards and allow the rules on dumping nuclear waste or even recycling it. Decades of experience with nuclear waste have shown that they are unspeakably dangerous, and it would be unconscionable to relax the standards or allow these dangerous wastes to be recycled or reused in any way.

Concerned Citizen,
Lynn Berman
