

AUG 12 1991

MEMORANDUM FOR: Raymond F. Fraley
Executive Director
Advisory Committee
on Nuclear Waste

FROM: James M. Taylor
Executive Director
for Operations

SUBJECT: SEMI-ANNUAL REPORT OF LOW-LEVEL WASTE MANAGEMENT
AND DECOMMISSIONING PROGRAM

This responds to your memorandum of June 24, 1991, in which you urge us to continue publication of the Semi-Annual Report on the Low-Level Waste Management and Decommissioning Program. Although the Advisory Committee on Nuclear Waste (ACNW) regards this publication, compiled by the Division of Low-Level Waste Management and Decommissioning (LLWM), as an important "avenue of communication," we believe publication of the report to be a resource-intensive effort that duplicates previously communicated information. The ACNW is kept abreast of the current activities through various mechanisms such as periodic briefings held by the LLWM, distribution of copies of memoranda and reports published by the LLWM, and by informal communications with the LLWM. LLWM also provides a review of each year's activities, similar to the semi-annual report, in its contribution to the Nuclear Regulatory Commission's Annual Report. We believe that a periodic summarization of these efforts would be duplicative and would not result in the optimum use of our resources. For these reasons, I continue to endorse discontinuation of this publication.

cc: The Chairman
Commissioner Rogers
Commissioner Curtiss
Commissioner Remick

This responds to your memorandum of June 24, 1991, in which you urge us to continue publication of the Semi-Annual Report on the Low-Level Waste Management and Decommissioning Program. Although the Advisory Committee on Nuclear Waste (ACNW) regards this publication, compiled by the Low-Level Waste Management and Decommissioning Division (LLWM), as an important "avenue of communication," we believe publication of the report to be a resource-intensive effort that merely duplicates previously communicated information. The ACNW is continually kept abreast of the most current activities through periodic briefings held by the LLWM, with copies of memoranda and reports published by the LLWM, and by frequent informal communications with the LLWM. Furthermore, LLWM provides a substantive review of each year's activities, similar to the semi-annual report, in its contribution to the Nuclear Regulatory Commission's Annual Report. We believe duplication of these efforts to be unwarranted.

The LLWM staff communicates to the ACNW its ongoing activities and agenda through a variety of informational medium. These efforts abrogate the need to commit valuable staff time and resources necessary to produce the semi-annual report. For these reasons, I strongly endorse discontinuation of this publication.
