

DOCKET NUMBER
PROPOSED RULE PR 20
68FR09595

From: "Thomas Baldino" <nastalbald@hotmail.com>
To: <secy@nrc.gov>
Date: Thu, Jun 26, 2003 8:17 AM
Subject: deregulating nuclear waste material

1724

Gentlemen:

I find unacceptable your 5 options in considering less regulation for low level waste materials. Even low level radiation is not good for us. It's another pollutant in combination to a whole barage of pollutants that modern man is being subjected to. Whereas some scientists in the past have found that radiation in small amounts may be good for us based on a study of a select athletic group in Japan after the A Bombs were dropped on it, a recent study done by Alice Stewart reverses those findings and pinpoints the flaws in the research methodology. Furthermore, as with the nuclear power industry, when the industry is put on its honor to regulate itself, safety is sacrificed and the profit motive reigns supreme.

DOCKETED
USNRC

June 26, 2003 (11:12AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Sincerely,
Thomas Baldino
19 North Street
Beacon, NY 12508
