

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: "Bob Doerr" <bdoerr@rollanet.org>
To: <secy@nrc.gov>
Date: Thu, Jun 26, 2003 9:04 AM
Subject: Radioactive waste

1725

It is my view as a retired physicist that the hazards of radioactivity are directly proportional to the amount of radiation. Thus the risk from one-half unit of radiation is one-half the risk from one unit of radiation, but not zero.

Therefore, I support Options 5 and 6.

Bob Doerr in the beautiful Missouri Ozarks
