Subject: Please prevent nuke waste from entering marketplace

1871

Dear NRC,

Please prevent nuclear waste from being entered into our society. All radioactive waste needs to be strictly regulated and should always be restricted from entering the market. Background radiation has already increased by a massive amount throughout the past 50 years, and our children should not be exposed to anymore radiation - in their playgrounds, in the streets, in the cars, in the materials we use everyday.

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Please do not agree on any of the 5 options u have proposed. I would advise you to look and study the Sierra Club proposal.

Thank you
