

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: "JM Tucker" <jmtucker@inreach.com>
To: <secy@nrc.gov>
Date: Fri, Jun 27, 2003 3:14 PM
Subject: Fw: comment on new NRC rule to allow radioactive materials release

1889

comment on new NRC rule to allow radioactive materials I totally agree with attached message sent to you from L. Litman. Hopefully, it has your full consideration.

Janet Tucker

USNRC****June 27, 2003 (3:31PM)****OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF**

NRC:

We all know there is no safe level of radioactivity--any amount can cause cancer. Your plan to treat some radioactive materials as below regulatory concern is outrageous. We do not want radioactive materials to turn up in our frying pans, belt buckles, and other common (or even not so common) items. I support the Sierra Club option:

Option 6--NRC to recapture the radioactive wastes that already have been released. Since the claim is made that these release have had no effect, Sierra asks them to prove it by identifying where the nuclear wastes have gone and checking to see what effects there have been.

Laurie Litman
