

Department of Energy
Washington, DC 20585

APR 13 1990

Mr. Robert Browning, Director
Division of High-Level
Waste Management
Office of Nuclear Material
Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Browning:

This letter is to notify you of the Department of Energy's (DOE) acceptance of the Lawrence Livermore National Laboratory (LLNL) Quality Assurance (QA) Program and to request NRC's acceptance, consistent with our agreements regarding OCRWM program participant QA program acceptance. It is the position of DOE that the LLNL QA program is acceptable to initiate activities supporting new site characterization. Subsequent to both NRC acceptance and actual initiation of these activities, DOE will submit to NRC a plan and schedule for assessing the adequacy of LLNL QA program implementation with respect to site characterization activities.

DOE's acceptance of the LLNL QA program is based on:

- a) DOE review and approval of the LLNL QA Program Plan (QAPP) and subsequent NRC acceptance of the QAPP (safety evaluation letter dated October 24, 1989, from Linehan to Stein).
- b) OCRWM surveillance of the Yucca Mountain Project Office (YMPO) QA program qualification audit 89-06, conducted June 5-9, 1989. (Enclosure 1)
- c) OCRWM review and concurrence of the basis for the YMPO acceptance of the LLNL QA program (by memorandum dated March 1, 1990, from Gertz to Shelor). (Enclosure 2)
