SUBJECT: REVIEW OF REVISION 2 OF THE DEPARTMENT OF ENERGY OFFICE OF
CIVILIAN RADIOACTIVE WASTE MANAGEMENT QUALITY ASSURANCE
PROGRAM DESCRIPTION DOCUMENT

The purpose of this memorandum is to request assistance from the Center for Nuclear Waste Regulatory Analyses (CNWRA) to review Revision 2 of the Department of Energy Office of Civilian Radioactive Waste Management Quality Assurance Program Description Document (QAPD) (See Enclosure). In accordance with Task 4 in Section 3.3.4, "Review Management Control Documents and QA Plan Revisions", of Contract-02-88-005, it is recognized that the CNWRA can assist the NRC in reviews such as listed above. However, at present, Task 4 is unfunded. Therefore, it is requested that funds be transferred from Task 1 in Section 3.3.1, "Audit DOE QA Program For Site Characterization", to Task 4 since it is expected that all planned activities included in Task 1 will not occur in FY 90.

In order to maintain the NRC staff review completion date of May 31, 1990, the CNWRA should be directed to begin work immediately on this task. The estimated CNWRA staff level resources for this review effort are expected to consist of 2 full time staff weeks. No proposal for this effort is required; however, the CNWRA should submit a Spending Plan to the NRC for this activity one week after receipt of the NRC authorization letter.

Should you have any questions, please contact Kenneth Hooks on (301) 492-0447.
