

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: william rogers <wfrog@usadatanet.net>
To: <secy@nrc.gov>
Date: Sat, Jun 28, 2003 8:27 AM
Subject: nuclear risks

2163

Dear Secretary,

I find it bizarre that the NRC would consider any action that would increase the public's exposure to the hazardous effects of nuclear waste. The Commission needs to safeguard us by isolating these materials, whether they are from weapons, power plants. There is no valid reason to adopt dose- or risk-based standards. Naturally occurring radon in our homes and workplaces is enough of a hazard without compounding it by adding other known sources of ionizing radiation.

Stop the poisons.

Sincerely,

William F. Rogers
135 Clinton St
Alden NY 14004

DOCKETED
USNRC

June 30, 2003 (2:01PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Tell the NRC to:

- * Focus the rulemaking on better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately;
- * PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses;
- * Prevent additional radiation exposures rather than "justifying" them

with computer

- codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards;
- *, accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit, since there is no safe dose of ionizing radiation; and
- * Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.
