SUBJECT: COMPARISON OF MODEL STUDIES: THE HANFORD RESERVATION

Attached please find a copy of "Comparison of Model Studies: The Hanford Reservation." The report contains our current position on the Department of Energy modelling effort and identifies areas of disagreement and agreement between the most recent Rockwell and Battelle PNL hydrologic attempts. This fulfills the requirement of milestone 311446 to incorporate available data into the groundwater flow model. The report also recommends areas where more data would be useful and identifies critical parameters. The report should be reviewed internally and then sent to DOE with a request for their comments.
