MEMORANDUM FOR: Division of High-Level Waste Management Staff

FROM: B. J. Youngblood, Director
Division of High-Level Waste Management

SUBJECT: SYSTEMATIC REGULATORY ANALYSIS (SRA) MANDATORY TRAINING

This memorandum is to inform you that a SRA training course is planned to be given by the Center for Nuclear Waste Regulatory Analysis (Center). This course will cover the SRA process and procedures and how it is applied in the Division. The course will be presented to the staff on June 18-19, 1991. General SRA training will be provided June 18 and more specific training, involving preparation of input to the SRA database, will be provided on June 19. The second day training is optional except for those staff involved in the three SRA example tasks.

This course is mandatory for the Division staff and will be given twice. The date for the second course offering will be determined at a later time. Attendance at the June session must include those individuals assigned to the three SRA examples and their section leaders. Other staff that do not have conflicting schedules should plan to attend the first course. Managers are reminded that adequate coverage in the section, approximately half, should be maintained. Please inform Phil Altomare of your intention of attending the June 18-19, 1991 or later course.

(Original Signed by *J. Youngblood*)

B. J. Youngblood, Director
Division of High-Level Waste Management
