Dear Mr. Browning:

During the past three weeks our office has conducted its comment resolution workshop for the assembled Site Characterization Plan (SCP) for the Nevada Nuclear Waste Site Investigation (NNWSI) Project. As a result of this workshop, a marked-up version of the document identifying remaining necessary revisions has been assembled. This mark-up is currently being put into final production at the NNWSI Project with a scheduled issue date of August 21, 1987.

To assist your staff in becoming familiar with this document and to facilitate your review of the SCP once it has been issued, we have made a copy of this mark-up available in the Department's National Energy Information Center. The Center is located in room 1F-048 of the Forrestal Building at 1000 Independence Avenue, S.W., Washington D.C. The document will be kept at the information desk, and will be available for use in the Center upon request beginning Tuesday, July 7, 1987. Because the document is a mark-up, we request that it be used in the Center only and that no copies be made. The document similarly will be available to representatives of affected States and Indian Tribes for their use.

If you have any questions regarding its availability, please contact Carol Hanlon at 202-586-1224.
