U.S. Regulatory Commission,
Washington, D.C. 20555
Attention: Rulemaking and Adjudications Staff**

Dear Secretary:

Please take all action possible to prohibit release of radioactive materials and wastes into the marketplace for any use whatsoever. It seems to me to be a no-brainer that I do not want any risk of radioactive contamination for my self or anyone else, and by "any" I mean absolutely none. No addition to radiation exposure, above what naturally occurs, should be acceptable--for humans, for all other animals, and as much as possible for the rest of the environment. We are, after all, all linked together.

**I hope you will be able to protect all of us from any danger of exposure.
Thank you for reading this letter.**

Sincerely yours,

Edith A. Sisson
