Subject: hazardous waste management

2393

Hello,

I'm writing to give you my opinion about how hazardous waste should be handled. I feel very very strongly that the goal should be to keep track of and isolate radioactivity and all materials contaminated with it, generated by nuclear power and weapons fuel chain industries, from the environment, workers and the public.

Please listen to the call of the Sierra Club to control and watch the effects of radioactive waste before deciding that it is safe.

I am a young woman of child-bearing age and I cringe at the thought of radioactive materials being allowed in land-fills, being incinerated, or better yet being "recycled" unlabeled into items I might buy.

Honestly, it's a disgusting thought to me.

Thank you for listening to the public's comments before making your decision. I urge you to think carefully about all the people who will be effected by your decision.

Sincerely,

Coree White
600 Boyd Rd.
Lafayette, TN 37083
