DOCKET NUMBER
PROPOSED RULE PR 20
68FR09595

From: "Pete & Lin Sternberg" <plstern@sover.net>
To: <secy@nrc.gov>
Date: Mon, Jun 30, 2003 11:27 AM
Subject: do not weaken 10CFR61

2473

To the NRC,

in reference to "Rulemaking on Controlling the Desposition of Solid Materials" , Scoping Process for Environmental Issues, Fed. Register , Feb.28, 2005, Volume 68 No.40 Pp.9595 - 9602 :

please do not weaken the existing guidelines for radioactive solid materials. I am very uncomfortable with allowing low level nuclear waste to be used for anything. I do not think the the benefit is worth the potential risks. Human error and greed could cause problems for thousands of years if this material is misused.

Thank you, Peter Sternberg
