Washington, DC 20555

Dear Mrs. Brooks:

This letter is to confirm our telephone conversation of Wednesday, January 17, 1990. As we agreed, the next two draft reports that are to be delivered to the NRC will be reviewed internally at SNL before they are sent to you. These reports are "A Comparison of Sensitivity and Uncertainty Analysis Techniques in Ground-Water Flow Modeling", Subtask 2.6d of FIN A1165, and "Techniques for Determining Probabilities of Events and Processes Affecting the Performance of Geologic Repositories: Volume 2 -- Suggested Techniques", Subtask 3.2 of FIN A1165. Having the reports reviewed internally and addressing the comments of the review will take an additional three weeks. Therefore, the due dates of these reports will need to be changed. The Subtask 2.6d report is now due February 21, 1990 and the Subtask 3.2 report is due February 12, 1990.

If you have any questions or comments, please feel free to call me at (FTS) 844-6206.

Sincerely,

Laura L. Price
