

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

September 6, 1994

Mr. Donald E. Saire  
Head, Waste Management Section  
Division of Nuclear Fuel Cycle  
and Waste Management  
International Atomic Energy Agency  
WAGRAMERSTRASSE 5  
P.O. Box 100  
A-1400 Vienna  
Austria

SUBJECT: 642-T2

Dear M. Saire:

I am responding to your letter dated July 24, 1994, requesting copies of videos available for your use as training aids. You indicated that you were interested in a wide variety of topics within the nuclear fuel cycle with an emphasis on waste topics; e.g., decontamination and decommissioning, environmental restoration, and waste disposal and site selection. You also indicated that the themes could be widely variable; e.g., social, technical, economic, etc.

Please find enclosed a selection of videos that we have copied for your use. Please feel free to edit and separate programs onto additional tapes as you feel appropriate. Some of the presentations were videotaped incidentally; this is reflected in the reduced quality of some of the tapes. We have combined a few of the programs to reduce the number of tapes necessary for postage and handling purposes. I have also enclosed a list of the program titles for your convenience. The videos are provided in VHS (NTSC) format.

In addition, we are aware of other videos about radioactive waste management, environmental restoration, and decommissioning that may be available through the U.S. Department of Energy. For example, NRC staff has recently participated in a video conference training series on radioactive mixed waste that was produced by the University of New Mexico, under sponsorship by the Department of Energy. For more information regarding this program, we suggest that you contact:

MS CONNIE CALLAN

## Video Program Titles

1. LLW Management and Disposal Conference (Virginia State University)  
(3 tapes)
2. Barnwell (LLW Disposal) Site Presentation
3. Conference on "Radioactive Waste Issues: Present and Future Perspectives"  
(2 tapes)
4. The Transport of Radioactive Materials
5. Understanding Low-Level Radioactive Waste Management (2 tapes)
6. Radiation Safety Inspections of Highway Vehicles Transporting LLRW
7. SEG Metal Processing
8. Waste Drum Assayer Capabilities
9. Concrete Block Removal
10. B&W Apollo Decommissioning
11. Disposal of Activated Metals Shipped in an IF-300, Spent Fuel Shipping  
Cask
12. Disposal of the Pathfinder Reactor Pressure Vessel (RPV) as Class A LLW
