Ms. Judy Treichel, Executive Director
Nevada Nuclear Waste Task Force, Inc.
Alamo Plaza
4550 W. Oakey Blvd., Suite 111
Las Vegas, Nevada 89102

Dear Ms. Treichel:

I am responding to your letter of May 7, 1997, and I would like to thank you for the opportunity to address your concerns regarding public input activities related to the high-level waste (HLW) program. As stated in your letter, these concerns arose from your task force's role as a primary point of contact for residents of the State of Nevada and other interested parties, regarding information on the Federal HLW program. Specifically, you indicated that the working relationship between the U.S. Nuclear Regulatory Commission (NRC) and the U.S. Department of Energy (DOE) during the "pre-licensing phase" of the HLW program, and NRC's focus on "issue resolution," has made Nevadans and others suspicious that important decisions will be made without public input. In addition, you indicated that NRC, as the licensing agency, must be sensitive to and aware of the public's expectations in "pre-licensing" as well as the licensing process. As a result, you have proposed that two open and easily accessible meetings be held each year, one in Nevada and another in a transportation corridor city, so NRC and DOE can hear and consider the public's ideas and viewpoints.

As you are aware, from your experience over the past ten years in participating in meetings and other interactions involving the HLW program, NRC has a longstanding practice of both providing the public with the fullest information practicable on its activities, and of conducting business in an open manner (58 FR 48081). In keeping with this policy and to provide more opportunity for interaction with the public in this time of reduced budgets, NRC considers your suggestion worthy of careful consideration. As a first step toward implementation, NRC will include your proposal on the agenda of the next quarterly NRC and DOE management meeting, for discussion with DOE, State of Nevada, affected units of local government, and Indian Tribes. Dr. Michael J. Bell, Acting Chief, Performance Assessment and HLW Integration Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, will contact you directly to discuss this proposal further.

120037

Sincerely,

Shirley Ann Jackson
