The purpose of this modification is to: (1) confirm verbal authorization given on May 2, 2003 to commence work under Task 18; (2) incorporate Task 18 entitled "ADAMS Retrofit of High-Level Waste Paper Documents" into the order. All work shall be performed in accordance with the attached Statement of Work for this effort, and the contractor's technical proposal dated April 18, 2003; (3) increase the ceiling of the order in the amount of \$325,239.11 from \$6,255,120.69 to \$6,580,359.80; and (4) provide incremental funding in the amount of \$570,000.00, of which \$370,000.00 is for the continuation of tasks supporting the document processing effort, and \$200,000.00 is for performance of Task 18. Accordingly, the order is modified as follows:

1. Under the Price Schedule, page 8 is revised to ADD Task 18, and page 9 is ADDED.
2. Under Section D.9, Consideration and Obligation, the first paragraph is deleted and replaced with the following:

"The total estimated amount (ceiling) of this order is \$6,580,359.80 (inclusive of Task 18)."

Also under this Section, the first sentence of the third paragraph is deleted and replaced with the following:

"The amount presently obligated with respect to this order is \$5,321,510.08"

Attachment 2 to this modification contains replacement pages, which reflect the changes mentioned above, and correspond to the numbered pages in the original Statement of Work. For the Price Schedule, replace page 8 and add page 9, and for the Statement of Work, replace page D-13.

Accounting information for Modification No. 10 follows:

### Task #18 - ADAMS Retrofit of High-Level Waste Paper Documents

Currently, the U.S. Department of Energy plans to submit its application for a license to receive and possess high-level radioactive waste at Yucca Mountain, Nevada, to the U.S. Nuclear Regulatory Commission (NRC) in December 2004. Pursuant to 10 CFR Part 2, Subpart J, the NRC, as a party to the High-Level Waste (HLW) proceeding is required to make it documentary material available electronically via the Licensing Support Network (LSN). The NRC must certify that it has complied with the provisions of Subpart J no later than five months before DOE submits its application.

The Contractor shall retrofit historical high-level waste paper documents into ADAMS that must be made available electronically via the LSN. The Contractor shall be responsible for ensuring that the text generated from the Optical Character Recognition (OCR) process on scanned images is in compliance with OCR accuracy rates contained in the LSN Guidelines. The Contractor shall be responsible for preparing the paper documents for scanning, scanning the paper documents, performing 100% quality control check on images created, completing the ADAMS profile and creating a package if appropriate, performing quality control check of the ADAMS profile, declaring the documents as Official Agency Record (OAR), replicating publicly available documents to ADAMS PARS and filing the documents.

The NRC File Center shall serve as the central control point for the contractor to pick up documents for processing and to deliver documents after processing has been completed. The Contractor shall be responsible for tracking and verifying that documents received for processing are returned to the File Center. The Contractor shall implement procedures for notifying the NRC Project Officer when documents available for processing fall below a five-day work level to ensure that the flow of documents to the contractor is sufficient for the contractor to meet daily production requirements.

The Contractor shall be responsible for processing approximately 13,260 (unique Accession Numbers) consisting of approximately 344,760 pages. The Contractor shall process documents in accordance with the DPC SOP manual.

The Contractor shall be responsible for implementing a manual OCR cleanup process to ensure that high-level waste source paper documents that are deemed to be of poor quality meet the accuracy rates stated in the Licensing Support Network (LSN) Guidelines 15., "OCR Accuracy." The Contractor shall perform cleanup on 2 to 5 documents a day. The Contractor shall implement its quality control process that provides reasonable assurance of compliance with OCR accuracy rates contained in the LSN Guidelines. The Contractor shall ensure the DPC SOP manual is updated to include procedures for performing the OCR cleanup task for this effort.

This task shall be considered a special project under the delivery order. Document processing statistics for this task shall be maintained separately from other tasks and shall be included in both the Daily Projection Indicators Report and the Monthly Progress Report. The Contractor shall maintain and report labor hours and other associated costs separately from other tasks in the monthly invoices.

**PERIOD OF PERFORMANCE**

Task 18 shall commence on May 2, 2003 and expire September 5, 2003.
