University of Washington
Processing System

Introduction

"This document gives a brief introduction to the complete seismic recording and analysis system as it is currently implemented at the University of Washington. It outlines the procedures for maintaining data integrity and quality control."

Subheadings:

Seismograph Stations and Implementation
Recording Facilities
Maintenance
On-Line Recording
Off-Line Processing
Catalogs and Maps
Quality Control

document also has a section which gives a description of the working commands and lists the available programs and their background information.
